

## **List of Processed LRI**

### **Process leased out: (02) two**

1. A process for the preparation of protein filler as a retanning agent for leather processing;
2. A process for the manufacture of anti-wrinkle agent and its application in leather processing.

### **Processes ready for lease out to the entrepreneurs: (19) Twenty Nine**

1. Recovery of usable basic chromium sulphate from spent chrome liquor;
2. Production of wood seasoning chemicals from spent chrome liquor;
3. Preparation of chrome alum from spent chrome liquor;
4. A process for the manufacture of pickling agent and its application in leather processing;
5. A process for the manufacture of anti-wrinkle agent and its application in leather processing;
6. Preparation of chrome lemon from spent chrome liquor;
7. Preparation of chrome red from spent chrome liquor;
8. Preparation of ammonium chrome alum from chrome shaving dust and spent chrome liquor;
9. A process for the preparation of protein filler as a retanning agent for leather processing;
10. Production of synthetic tanning agent from naphthalene and its application in leather processing;
11. A process for the manufacture of non-ionic surface active agent for leather processing;
12. Production of aluminium sulphate from the ash of aluminium utensil industry;
13. Isolation of chromic acid from the ash of chrome shaving dust;
14. A process for the preparation of glutaraldehyde based tanning agent for leather processing;
15. Design and development of heat reactivation device for footwear industries;
16. Ammonia free deliming agent for leather deliming.
17. Design and development of footbed for diabetic footwear.
18. Production of footwear insole material from leather saving dust.
19. Preparation of water soluble fat liquoring agent from karanja seed oil (pongamia pinnata)
20. Development of technology for manufacturing flame retardant leather
21. A Process Development for Improvement of Leather's Grain Cracking Strength
